Respiratory Protection Systems

Full Face Respirators

SCOTT AV-2000® Face piece

Key to the Scott family of products is the advanced AV-2000 face pieces. A single face piece. A single fit test. That's all it takes. The AV-2000 face piece is fully interchangeable with Scott's full-line of SCBA, air-supplied respirators and air-purifying respirators, as well as Scott's communications products, giving users a solid, practical reason to choose Scott.

SCOTT AV-3000™ Face piece

The AV-3000 Face piece, leads the way by taking advantage of all the features found in the AV-2000 and combines them with improvements designed to provide the user better fit, added comfort and enhanced communications.

Promask 25 Gas Mask

The Promask 25 offers full-face protection with unrivaled comfort and protection against a wide range of respiratory hazards when used with our easy breathing 742 series twin cartridges. The halo-butyl elastomer face piece is resistant to chemicals, high temperatures and daily wear and tear.

Full Face Respirators

Promask 40 Gas Mask

The Promask 40 offers full face protection with unrivaled comfort and protection against a wide range of respiratory hazards. The halo-butyl elastomer face piece is resistant to chemicals, high temperature and daily wear and tear. NATO style 40 mm connectors are located on each side for left or right handed mounting of the canister.

M95 Gas Mask

The M95 is designed to meet the most critical hazards and stresses encountered in combat situations. The superior protection of the halo-butyl elastomer face piece has been proven with live agent testing. The dual lenses combined with the low profile of the mask offer an extremely wide field of vision. Available with or without a drinking tube for rehydration. An optional drinking canteen is also available.

Full Face Respirators

Face piece Adapters

Scott provides a full line of adapters to accommodate specific respiratory needs. These adapters can all be used with the AV-2000®, AV-3000™, Scott-O-Vista® or Weld-O-Vista™ face piece.

1/4 Turn Adapter

For use with 742 series twin cartridges.
Low profile, allowing for use of communications.

Chin Canister Adapter

For use with all 631 series chin canisters.

40mm Adapters

For use with 40mm Powered Air-Purifying Respirators (PAPR's).
Can also be used directly with 40mm MPC Plus cartridges, P100 cartridges, NTC-1 canisters, Enforcement cartridges and NBC canisters.

V-Bar Adapter

For use with 642 series twin cartridges.
Allowing for use of communications.

Fit-Testing Equipment

Scott offers a complete selection of probed adapters to permit quantitative fit testing on any Scott face piece. See Fit-Test Adapter chart.

Fit-Testing Adapter Chart

Quantitative Fit Testing Device	Face piece to be Fit-Tested	Quantitative Fit-Test Probe Adapter Required	Also Requires Use of
TSI PortaCount	Xcel™ Half Mask	7422-FT1	742 Series P100 Cartridges

Respiratory Protection Systems

Powered Air-Purifying

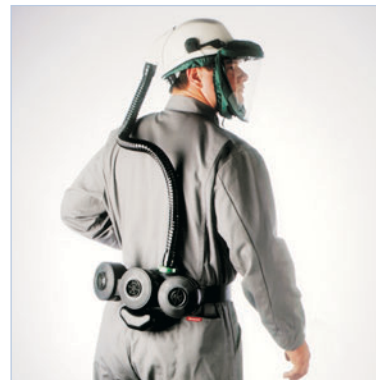

C420 PAPR

Scott's NIOSH approved C420 Powered Air-Purifying Respirator, unlike traditional industrial PAPR's is designed for use in Domestic Preparedness environments. The C420 PAPR provides a cooling/fanning effect and a lightweight design, which provides the user greater comfort for extended wear times.

Tornado® Powered Air-Purifying

The new Scott Tornado is a Power Air-Purifying Respirator for use in environments where protection from particulates and toxic vapor and gasses is necessary. The durable, lightweight, modular design allows for ultimate user comfort and convenience. Work for extended durations and be comfortable and confident in your environment knowing that you have the power of a Tornado with you.

Proflow 2 SC

The Proflow 2 SC PAPR is designed for use in multi-hazard environments. The microprocessor controlled airflow management system automatically compensates to provide proper airflow regardless of cartridge type used. Proflow 2 SC has a visual and audio alarm feature to warn the user of low battery or reduced airflow that may indicate a loaded filter. When worn with the M98 or AV-3000, it is an ideal powered air purifier for domestic preparedness situations, law enforcement personnel or search and rescue scenarios. To facilitate load tracking and servicing, the Proflow 2 SC incorporates a data logging function, which automatically records information about the usage and performance of the blower unit.

Respiratory Protection Systems

Full Face Respirators

40mm Chin Canisters

Designed to protect first responders and clandestine lab investigators in Non-IDLH and Non-Oxygen deficient conditions against nuclear particulates, toxic or biological particulates, as well as chemical vapors, gases and mists/aerosols and tear gas.

For use on Scott-O-Vista, Weld-O-Vista, AV-3000™ and AV-2000 full face pieces with 40mm adapter (805059-01).

P100 - NIOSH approved for use against all particulate aerosols, which may contain oil; this filter has an efficiency level of 99.97%.

MPC Plus Cartridge - NIOSH approved for use against Ammonia, Chlorine, Chlorine Dioxide, Formaldehyde, Hydrogen Chloride, Hydrogen Fluoride, Methylamine, Organic Vapors, Sulfur Dioxide, or FOR ESCAPE ONLY FROM Hydrogen Sulfide and all particulate aerosols.

Enforcement Cartridge - NIOSH approved for use against Phosphine, CS, CN (Tear Gas), Ammonia, Chlorine, Chlorine Dioxide, Formaldehyde, Hydrogen Chloride, Hydrogen Fluoride, Methylamine, Sulfur Dioxide or FOR ESCAPE ONLY FROM Hydrogen Sulfide and all particulate aerosols.

Multi-Wash™ Cleaner/Disinfectant

Simplify your respiratory protection program by incorporating Scott's Multi-Wash Mini into your cleaning and disinfecting procedures. Multi-Wash Mini is a pre-measured iodine based solution of both cleaning and disinfecting ingredients, eliminating the need to mix and measure disinfectants with water.

Halfmask Respirators

Xcel Halfmask Face piece

The Xcel half mask features four optional sizes molded from soft, yet durable thermoplastic elastomer material to ensure a perfect fit for most everyone. Wide elastic bands provide comfortable one point adjustment and a convenient "D" clip makes fastening quick and easy, even with gloved hands. An optional voicemitter allows for added clarity in personal communication. Xcel requires two cartridges for the complete line of 742 easy breathing twin cartridges.

742 Cartridges

The easy breathing 742 series twin cartridges were developed to provide respiratory protection in non-IDLH industrial or HAZMAT situations. A simple quarter turn of the cartridge provides secure fit. The low profile of the cartridge allows the user a full range of vision. The 742 series is available in a full range of filters, chemical cartridges or combination cartridges.

- For use on XCEL™ Half-Mask and all Scott full face pieces including AV-2000®, AV-3000™, Weld-O-Vista® and Scott-O-Vista®
- Full range of NIOSH 42 CFR Part 84 approved filters, chemical cartridges for gas/vapor and combination particulate/gas/vapor cartridges
- Provide extended service life and low breathing resistance
- Plus series cartridges provide almost double the service life with 120cc of Carbon
- Multi-Purpose cartridge protects against multi-hazard vapors and gases allowing freedom to move within areas with multiple exposure hazards. Also available with N 95, R95 or P100 particulate filters
- Quarter turn adapter for full face pieces is low profile, providing user with unobstructed field of vision
- Provide respiratory protection in Non-IDLH Industrial and HAZMAT applications
- AV-2000 face piece with quarter turn adapter allows for interface with all of Scott's communication devices
